

**Index**

A cells	65
Affinity maturation	27
AIDS pathogenesis	216
Allogeneic MHC	178
Allotypes	20
Allotype suppression	141
Anti-antibodies	15
Anti-anti-self	199
Antibody dependent cellular cytotoxicity	65
Antibody diversity	10
Antibody structure	11
Antigen diversity	10
Antigen dose	28
Antigen presenting cells	184
Antigen structure	15
Antigenic competition	46, 134
Antigen-presenting cells	66
Antigen-specific T cell factors	58
Antigen-specific factors and help or suppression	139
Auto-antiidiotypes	147
Autoimmunity	209
B cells	31
Baruj Benacerraf	256
Bottom-up approach	8
Carriers	44
CD molecules	69
Clonal selection	21
Complement	66
Complexity and stability	152
Connectivity	104
Connectivity of CD4 T cells	181
Connectivity of CD8 T cells	181
Contrasuppressor T cells	59
Co-selection	104
Criss-cross specificity	36
Cross-linking of receptors	91
Cross-linking of IgE	125
Cross-reactive antigens	144
Cytokines	67
Cytotoxic T cells	33
Dominant idiotypes	147

ELISA	22
Epitopes	15
Experimental immunology	3
Fc receptors	65
First symmetry	88
Haptens	44
Heavy chains	17
Helper T cells	44
HIV	216
HIV vaccine	230
Hypotheses	1
Idiotopes	15
Idiotypes	16
IgA	18
IgD	20
IgE	20
IgG	18
IgG inhibition	135
IgM	18
IgM enhancement	135
I-J	187
IL-1	68
IL-2	68
IL-6	68
Immunogenicity	142
Interleukins	67
Internal images	17
Isotypes	17
Kinetics of tolerance induction	136
Linkage disequilibrium	183
Lymphokines	67
Macrophages	65
Mathematical modeling	2
Memory	23
MHC	65
MHC and T-B collaboration	184
MHC class I and CD8	180
MHC class II and CD4	180
MHC genes	177
MHC haplotypes	177
MHC molecules	177
MHC polymorphism	183
MHC restriction	175

Mitogens	40
Models	1
Modes of response	128
Monocytes	65
Multiple stable states	98
Multispecificity	38
<i>N</i> -dimensional dynamics	165
Niels Jerne	70
Non-specific T cell factors	58
Peter Richter	79
Primary response	23
Responses to hapten-carrier conjugates	130
Rheumatoid factor	69
Second symmetry	199
Second symmetry and anti-I-J	203
Secondary response	23
Self tolerance	210
Self-nonsel self discrimination	209
Shape space	205
Stability	98
Stability analysis using eigenvalues	116
Suppression induced by low doses of antigen	138
Suppression induced by low doses of antiidiotype	139
Suppressor T cells	48
Switching between stable states	124
Symmetry in inhibition	95
Symmetry in killing	93
Symmetry in stimulation	92
Syngeneic barrier	150
T cells	31
T cell preferences	182
T cell repertoire	175
Teresa Imanishi-Kari	149
Th1 cells	68
Th2 cells	68
TH1 cells	68
TH2 cells	68
Theories	1
T-independent antigens	33
T-independent antigen responses	143
Tolerance	28
Tolerance without antigen	143
Tolerance without suppression	142

Tolerogenicity	142
Top-down approach	8
Turnover rate of lymphocytes	123
Two signals for stimulating T cells	127
Two signals for switching on B cells	128
Unpredictability axiom	153
