

# Phys 259 Practical Exam, Dec. 10, 2007

---

You will have **1 hour** to perform a simple measurement using the devices and skills you have learned during the course of the class. A single sheet of formulas and notes may be brought to the exam, and the use of calculators is permitted.

The practical exam will be given in three groups so that everyone has access to their own lab bench and equipment. The times are staggered by 1.5 hours to allow 30 minutes for cleanup between groups. Consult the following tables for your assigned time.

## Mon Dec 10, starting at 8:30 am (sorry!) in Hebb 30

### 8:30 am – 9:30 am

Al-Balushi, Ibrahim Harib
